The Southern California DX Club Newsletter est. 1947

***"If you need him
get in there and
work him"***

The Southern California DX Club is a group of dedicated men and women active in the amateur radio community who enjoy communicating over the air with other radio amateurs around the world.

The newsletter is published every month and is released to it's members on about the first of each month. Amateur and DX related letters, news and pictures are welcome and will be published as time and space permit.

Articles may be republished with the recognition of the author and the club. Reuse of copyrighted materials require the original author's permission.

Any questions regarding this newsletter or it's articles should be addressed to the editor, Bill
n6rv@scdxc.org

Meetings are held on the second Thursday of the month at 7:30 PM except April, June and December.

Please check the club web site for events and details at
<http://www.scdxc.org>

If you are in the area please say hello on our repeater
W6AM/R145.48,(-) 100Hz PL

NEXT MEETING Visalia!!!! YAAAAAHOOOO!

We will see you there!

• Lee Freeman, AC6AJ SK

**• Bob is in Iraq!
Work him often and a lot!**

**• Program for April
Gone to Visalia!
No meeting!
Join Us!**

**Making friends all over the world using the magic of Amateur Radio.
Sponsors of the International DX Convention at Visalia, since 1949**

Lee Freeman, AC6AJ (SK)

It is with great sadness that we report the passing of Lee Freeman, AC6AJ. Lee was a long time member of the SCDXC.

We are told that there are no services planned, if we get any different information it will be posted here.

THE PREZ SEZ
Larry Mallek, K6YUI,
President – Southern California DX
Club
[**k6yui@scdxc.org**](mailto:k6yui@scdxc.org)

Well here it is all most the end of March, and time to sit down and do my input for the newsletter. Where did March go? There are parts of it I don't remember. Guess I was on the radio working DX. Yes there has been quite a bit of it on the bands. Many of our members have been talking about all the new ones they have worked in the last weeks.

It was great to have Paul – W6BZH come and tell us all about the years of looking for and finding RFI problems for many of our members. Remember not all problems come from outside of our own homes.

Well John – N6QQ our Vice President did it again and had some really great prizes last month. John will have a month off for getting prizes since we will all be in Visalia trying to win some really great prizes at the Convention.

I was looking at the DXCC listing for our members and would you believe we have 39 members with 300 or more countries. We also have 16 members who have all 338 countries. WAY TO GO PEOPLE.

Well that's it for this month, and I hope to see many of you up north in Visalia for the convention.

REMEMBER DX IS

Larry Mallek K6YUI
President SCDXC

Officer Guidelines

In 2000 Jim Zimmerman, N6KZ, and Chuck Constantine, KR6C generated a set of guidelines for club officers. Steve Shane, W6NRQ, headed up an effort to update these guidelines. The board reviewed and approved them. They are posted at the site

VICE PRESIDENT'S CORNER

John Schroeder, N6QQ,

Vice President – Southern California DX Club

n6qq@scdxc.org

Hello Everyone!

Our March meeting was a great success. Paul Charbonneau, W6BZH, from Los Angeles Department of Water and Power gave a great talk. Lots of questions from the audience were answered. Paul pointed out that a majority of the noise we hear is not from the DWP or Edison. Somewhere around 20% of the noise is actually from the electric power distribution system. The majority of the time it is from within your house or a neighboring house. The hams in living in the DWP area are sure going to miss Paul and his knowledge.

Dxer of The Year
Nominations are closed
as of March 1st
The Clipperton
Award
Applications are closed
as of March 1st.

How are the bands during for you? I have picked up 42 countries on 12 meters in the last 2 months. Between contesting and watching 17 and 12 meters the bands sure are keeping me busy. The two RTTY contests this month should keep the digital people happy. The bigger of the two is the EA RTTY Contest on Apr 3-4 . Need More JA QSL cards? The Japan DX CW Contest is on Apr 10-11. I need more JA's. I have only worked 16,000 so far with 10,000 QSL cards to confirm the Q's.

There is lots of DX to work this April:

Look for YI9PSE from Kurdistan (Iran) April 3 thru April 11

Marion Island ZS8M April 29-30

Bhutan A52SW April 23 to May 1

There will be over 25 DX expeditions during April - Lots of good stuff. Go to this site to take a look at the other expeditions: <http://www.ng3k.com/misc/adxo.html>

The March raffle featured a 24 inch LCD monitor and an Cannon Ink-jet printer plus other goodies. Raffle Tickets are selling well. I hope my May offering for the Raffle gives you lots of reasons to buy more tickets.

The Visalia Convention committee is a joy to watch. I am amazed at the planning and the details that go into making a DX Convention successful. The DXer of the year (2009) has been picked. I believe the person was a great choice, adding to the long list of DXers who exemplify the DXer of year tradition.

Planning for the June Picnic is moving along. I am looking at several ideas for the main prize plus the other Raffle goodies.

See you in Visalia and remember if you hear me calling YI9PSE I need him for my 326th country!

73, John N6QQ
Vice-President, SCDXC

THE EDITOR
Bill Kendrick, N6RV,
Editor – Southern California DX Club
n6rv@scdxc.org

VISALIA!!!!

I knew I was going to be busy this month so I started this column on the last day in February. That day I received my daily email from our convention / committee treasurer. The head count for pre-registration is 375. If that is any indication of success then we are about 60% over the same time last year! Now at press time we have over 600 pre-registered attendees. It speaks to how excited people are to go this year and that the anticipation of the long delayed upswing in sunspots is at a crescendo. I am sure that the turn out is going to be large this year and no one will be disappointed in the event! We even resurrected the CW Pile Up Contest! The file is in my possession, the room is secured and the prize is a surprise (Well... not so unusual for a CW contest!). This convention will be a success because you attended and made it great! See you there!

The amount of effort expended to produce the program for this years convention was enormous. This month's newsletter suffered from a little neglect. Furthermore the amount of input received has fallen off. We need a dedicated individual to assist in writing a profile column. Also it would be nice to have someone collect the various pieces of our club history from members who have volunteered to lend their collection, copy, scan, and set up a database so we can start a history column. We are not getting any younger and much of the information may be lost. If either of these jobs interest you let me know!

As far as DX is concerned remember that fellow club member Bob Grim-mick, N6OX is out in the far reaches of Southwest Asia. If you know the region then you understand he is standing on ancient ground whose history spans way back into antiquity, predating written history. So the least we could do is work YI9PSE on every band and mode possible to bring the DXpedition to the top of modern historical accomplishment! Good luck and come back soon Bob! As I work on the finishing touches of this newsletter 15 meters is going in the background. I worked 4 new band / modes as I was working. Three of them were in the same region that Bob will be operating from. HZ, 4X, & SV. The fourth was just a ZK3... Just a ZK3! That was a new one for me on 15. The solar flux is only 84 but the band is cooking. I was listening to Europe at noon on 15! That has not happened in years! Now I need to get the SteppIR up so I can work the WARC bands!

73, de N6RV ... --. --.

New Members

I have to thank Keith, K6LD, for the great photo coverage of the meetings. We have a steady stream of visitors and new members every month. Welcome! We hope you find our unique club inviting and enjoyable. The group is exceptional and your membership will add to our quality!

Please welcome new members:

Gabriel Calfas
K6AWB

Diana Feinberg
AI6DF

Linda Souder
KD6HYN

Lloyd Hendrickson
K6NQY

David Lopez
KN6OP

Stan Thornton
KI6QM

Randy Johnson
W6SJ

Dale Piedfort
KB7UB

Mary Gray
KH7VZ

Make sure you meet and greet them at the next meeting!

RUMORS ON THE BAND

A plethora of announcements, rumors, and serious DX fun

There are several DXpeditions from very rare countries happening during March! Also the ARRL SSB International DX Competition will provide many opportunities. With the solar flux on the rise we should have a pretty good spring all in all. Even 6 meter sporadic E is kicking in early!

Orange Information indicate particularly rare entities and **Red information** indicate SCDXC member attended DXpedition. As always you have to turn on your radio to work them.

YI9PSE Iraq - Kurdistan

This is probably the biggest DXpedition of the year. It probably can only be eclipsed by a similar one to P5, T5, VK0H, or YA.

Our own member DXpeditioner extraordinaire, Bob Grim-mick, N6OX has joined a large team who will brave the wild, wooly, and dangerous wilderness of Kurdistan, Iraq. Actually they will be in a huge hotel with plenty of security. Even then I would be wearing my Kevlar underpants! The DXpedition is scheduled for the beginning of April. It is an all out effort to get YI on the map before the US heads home. They will be running 2 SSB Stations, 2 CW stations and a Digital station. They will be outfitted with five Elecraft K3s, 2 Acom 1000 amplifiers, 3 Acom 1010 amplifiers, a SteppIR 3 element yagi with the 40 meter dipole, two SteppIR 2 element yagis, a Force 12 C3S, two SteppIR BigIR verticals antennas and amplifiers, verticals for 80 / 160 and beverages. This is a serious operation. Make plans to work them on as many bands as possible. Visit their website <http://www.yi9pse.com/>

GOOD LUCK BOB!

SPURIOUS OUTPUTS

Comments, Announcements, and Interesting Tid-Bits Submitted by Members

My New Station (K6LD)

Keith has forwarded two pictures of his new set up. He says he will start out small but knowing Keith it won't be long before he is up and running big time!

Streaming Video (N6RV)

At the this month's board meeting an interesting suggestion was made. Many of our members can no longer make the nighttime excursion to the club meeting. The technology exists to bring the meeting to them. Some clubs use streaming video over the internet to broadcast their meetings. What do you think? Would this be something we should do? Let us know!

Need a Ride? (N6RV)

Along the same line as the suggestion above we would like hear from anyone who is in need of a ride to the meeting. Maybe some of us know of people in our area who would like to attend but need a ride. If you can help out or if you would like a ride please contact the club secretary. We are putting together a system to place riders in contact with volunteer drivers.

Open Repeater (N6RV)

It has been brought to our attention that some believe that the SCDXC repeater is closed only for members use. The board stresses that this is not the case. Do not discourage anyone with a valid amateur radio license from using the club repeater. The repeater system is wholly owned by The Los Angeles Department of Water and Power. They have graciously allowed us use. It is open to the amateur radio community.

We have an automated DX announcement system on the repeater. The repeater also has an long squelch tail. When using the repeater allow the squelch tail to drop out and let the announcements be made. If this does not happen the announcements stack up in the queue and when they are transmitted the repeater times out.

Miscellaneous Items (W6MPB)

As always Urban comes up with some very cool websites and memorabilia. Consider the ad below. Now that was less than 70 years ago. In fact it was probably in most of our lifetimes! Do you think that anyone would have believed you would be able to replace this device with one that fits in the palm of your hand. How much has changed in so short a period!

Urban also brought this website to my attention. It is one of the most thorough collections of math and science subjects I have seen. Anyone still interested in a little learning?

<http://www.khanacademy.org/>

Albert Einstein's Birthday (W6MPB)

March 14, 2010, π day, was the 131st anniversary of the birth of Albert Einstein. Below are Albert Einstein's thoughts on politics, science and life...

"How strange is the lot of us mortals! Each of us is here for a brief sojourn; for what purpose he knows not, though he sometimes thinks he senses it. But without deeper reflection one knows from daily life that one exists for other people -- first of all for those upon whose smiles and well-being our own happiness is wholly dependent, and then for the many, unknown to us, to whose destinies we are bound by the ties of sympathy. A hundred times every day I remind myself that my inner and outer life are based on the labors of other men, living and dead, and that I must exert myself in order to give in the same measure as I have received and am still receiving...

"I have never looked upon ease and happiness as ends in themselves -- this critical basis I call the ideal of a pigsty. The ideals that have lighted my way, and time after time have given me new courage to face life cheerfully, have been Kindness, Beauty, and Truth. Without the sense of kinship with men of like mind, without the occupation with the objective world, the eternally unattainable in the field of art and scientific endeavors, life would have seemed empty to me. The trite objects of human efforts -- possessions, outward success, luxury -- have always seemed to me contemptible.

"My passionate sense of social justice and social responsibility has always contrasted oddly with my pronounced lack of need for direct contact with other human beings and human communities. I am truly a 'lone traveler' and have never belonged to my country, my home, my friends, or even my immediate family, with my whole heart; in the face of all these ties, I have never lost a sense of distance and a need for solitude..."

"My political ideal is democracy. Let every man be respected as an individual and no man idolized. It is an irony of fate that I myself have been the recipient of excessive admiration and reverence from my fellow-beings, through no fault, and no merit, of my own. The cause of this may well be the desire, unattainable for many, to understand the few ideas to which I have with my feeble powers attained through ceaseless struggle. I am quite aware that for any organization to reach its goals, one man must do the thinking and directing and generally bear the responsibility. But the led must not be coerced, they must be able to choose their leader. In my opinion, an autocratic system of coercion soon degenerates; force attracts men of low morality... The really valuable thing in the pageant of human life seems to me not the political state, but the creative, sentient individual, the personality; it alone creates the noble and the sublime, while the herd as such remains dull in thought and dull in feeling.

"This topic brings me to that worst outcrop of herd life, the military system, which I abhor... This plague-spot of civilization ought to be abolished with all possible speed. Heroism on command, senseless violence, and all the loathsome nonsense that goes by the name of patriotism -- how passionately I hate them!

"The most beautiful experience we can have is the mysterious. It is the fundamental emotion that stands at the cradle of true art and true science. Whoever does not know it and can no longer wonder, no longer marvel, is as good as dead, and his eyes are dimmed. It was the experience of mystery -- even if mixed with fear -- that engendered religion. A knowledge of the existence of something we cannot penetrate, our perceptions of the profoundest reason and the most radiant beauty, which only in their most primitive forms are accessible to our minds: it is this knowledge and this emotion that constitute true religiosity. In this sense, and only this sense, I am a deeply religious man... I am satisfied with the mystery of life's eternity and with a knowledge, a sense, of the marvelous structure of existence -- as well as the humble attempt to understand even a tiny portion of the Reason that manifests itself in nature."

Albert Einstein

HOW ABOUT A MEAL WITH THE MEETING!

Take a stroll to the Roll N' Rye where everybody knows your name.

With the long drive from Perris our former president and Treasurer Cathy, K6VC, is the first there!

Soon a gathering of ham types ensues!

More hams on the lamb! ... or is it pastrami?

Before you know it the whole place is filled. Everyone is eating and talking. Notice how we trust each other with semi-sharp utensils!

After the nosh we hit the road!

Syd Kronenthal Park
Recreational Building
City of Culver City

Paul, W6BZH, gives an informative presentation on RFI

And Rich presents a plaque to Paul for his 20+ years of service to the DX community!

Look at those prizes! Notice something strange? Yeah! Not one of them is ham related.... But look at those prizes! Way to go John! He only buys things he likes! We like them too!

Hey! Who Won the Raffle?

N6VNI	LCD Monitor
N6QQ	Canon Printer
N6HY	Brothers FAX
WB6OFE	Cordless Drill
K6LD	DVD / Boxes
KJ6Y	Power Inverter
